Dear Mr. Japp

**TDEC Comment Letter**

**Phased Construction Completion Report for the Non-Time Critical Removal Action Building 9808 Demolition at the Y-12 National Security Complex, Oak Ridge, TN (DOE/OR/01-2696&D1) July 2015**

The Tennessee Department of Environment and Conservation, Division of Remediation-Oak Ridge Office (DoR-OR), has reviewed the above referenced document pursuant to the Federal Facility Agreement for the Oak Ridge Reservation. Although there are no specific comments, the State is withholding approval of this document until all the waste from this project is dispositioned. The document states that there are four 16-gallon drums and three B-25 boxes of mixed waste and PCB remediation waste that is currently in approved CERCLA storage awaiting shipment to an approved TSD for treatment and disposal in FY 2016. Once this waste is shipped offsite and DOE provides documentation that all the waste from this project has been disposed, the State will approve this document.

Questions or comments concerning the contents of this letter should be directed to Curt Myers at the above address or by phone at (865) 220-6565.

Sincerely

A handwritten signature in blue ink that reads "Randy C. Young".
